

A return to our roots

We wanted to try this path, selecting a large number of local plants, studying their particular characteristics, seeking to get the best from each of them and then uniting their extracts in a harmonious and perfect mixture – all of this with the aim that we had laid down at the beginning: *“To clean in a natural, simple and safe way”*.

ECO# contains all that nature offers us, a range of vegetable extracts whose structure we have made the best use of, evaluating with care all the specific characteristics and putting them together in a harmonious process aimed at intensifying their qualities. There is an efficient and versatile descalant and detergent action, combating dirt in general, and a neutralising elimination of *bad odours*, along with the notable *sanitising* and deodorising properties of its components, this in all the applications. It is incredibly simple to use in all work cycles, with total safety for people and for the environment. Volatile organic compounds (VOC) are totally absent, as are enzymes, bacteria, phosphates and preservatives.

The label carries no GHS danger symbols!

There is no need for personal protective equipment (P.P.E.).

No detergents of the ECO# range have been tested on animals.

Free from

- ✓ peg and parabens
- ✓ laureth, sls, sls
- ✓ edta, phosphates, gmo
- ✓ colorants and silicones
- ✓ petro-chemical derivatives
- ✓ synthetic perfumes

L'ALTERNATIVA NATURALE
the natural alternative

PROFESSIONAL **BIO**-DETERGENTS

ALTERNATIVE, EFFECTIVE, INNOVATIVE, ECOLOGICAL!

ECO#

L'ALTERNATIVA NATURALE
the natural alternative

100%
ecofriendly

The first range of **BIO professional detergents**, efficient and unique.

The **ECO#** range is made up entirely of molecules coming from vegetable components, obtained using particular processes of cold extraction.

We have taken what **nature offers us** and transformed this into an extraordinary product.

The detergent action of the products in the **ECO#** range comes about a **natural physical process**. The molecules that make up the products activate a detaching and descaling action on dirt that allows easy removal from any treated surfaces.

Total water solubility and high biodegradability are features of the **ECO#** range of detergents, which completely eliminate any risk deriving from conventional chemical working processes, and instead offer a virtuous and **totally biological cycle**, one that is extremely safe in every phase of the production process and usage.

ECO#TRAIN

A natural vegetable detergent specifically produced for cleaning railway carriages. Its formula removes dirt of all types that may be found inside the train, and is compatible with all types of material (laminates, trim, floors, glass, luggage racks, etc.). It leaves surfaces clean, hygienised and perfumed.

ECO#CLEANER

A universal natural vegetable detergent excellent for all washable surfaces. Its formula removes dirt of any type without the need to use solvents or alcohol. First class for cleaning the outside of railway carriages. It leaves surfaces clean and shiny.

ECO#DISHES

A natural vegetable detergent for hand-washing dishes, this has excellent detergent and degreasing power and contains delicate dermo-protective agents for the skin, even when there is prolonged contact. pH neutral.

ECO#SKIN

A natural vegetable detergent with neutral pH for in-depth cleaning of textiles and skin and leatherette upholstery. It contains hydrating and protective substances and is delicate even in cases of prolonged contact.

ECO#STOVIL

A concentrated natural vegetable detergent for dishwashing machines of all makes and models. It does not foam, and is also suitable for use with hard water.

ECO#CANDOR

A liquid natural vegetable detergent for laundry. Its formula allows dirt to be removed in a natural way. It is suitable for use with all kinds of laundry, and may be used at any temperature. It works perfectly both with hand-washed laundry and that washed in machines.
